RE: Certification update to re-affirm support for the City of Trenton Green Team.

Dear Sustainable New Jersey,

This letter of intent is to continue and provide support for the City of Trenton -Green Team (COT-GT). As you know, the COT-GT was established back in 2010 to be an advice and consent group towards sustainable land use and other types of projects sustained within the City of Trenton. Since then, the Team has obtained the highest level of sustainability of Silver and is looking to obtain the level of Bronze this year as we revamp the projects.

The City of Trenton Sustainable process is excelling in areas of improving energy efficiency and health and wellness, reducing waste, sustaining local economies protecting natural resources and advancing the arts. As we move forward with continued sustainable developments, the City is in full agreement to support and assist the Green Team in its positive efforts of sustainability. Please also note that the sustainability is also a vital part of our Trenton 250 Comprehensive Master Plan which is central to our Land Use Plan that include the elements according to the five planning principals; Economy, Environment, Equity, Efficiency and Effective action. These principals are used as part to provide directions for daily operation that will align with the Master Plan purpose and intent, which brings about sustainability.

Therefore, please be advised that the City of Trenton support and re-affirm the City of Trenton Green Team.

Sincerely,

The Honorable, Reed Gusciora, Mayor
